- The Brazilian Government is actively humanizing relationships worldwide and prioritizing macroeconomic stability.

Market Challenges

Brazil has a large and diversified financial system that offers many opportunities to its associates and export their commodities. Doing business in Brazil requires intimate knowledge of the domestic environment, including both the direct as well as the indirect costs of doing business in Brazilian market. Such costs are often associated with distribution, government considerations, worker benefits, environmental laws, and a composite tax structure. Logistics pose a particular challenge, given the lack of sufficient infrastructure to keep up with nearly a decade of economic expansion.

The Brazilian Government is the nation's largest buyer of goods and services. Navigating government procurement process can be challenging. Exporters may competitively disadvantaged if they do not have an important in-country presence – whether via established partnerships with Brazilian entities or some type of company subsidiary as well as the endurance and monetary resources to react on legal challenges and bureaucratic issues.

The unraveling embarrassment associated with vitality goliath Petro-bras postures another test to government and organizations, increasing vagueness and creating a drag on growth. In response to same, senior government authorities have vowed to bolster the on-going lawful and investigative procedures and Petro-bras has found a way to enhance interior consistence systems and restore certainty. While the financial and advertising outcomes have been serious, Brazil might yet grab a silver coating: an exhaustive duty to battle debasement could eventually enhance the business atmosphere, profiting neighborhood and worldwide organizations alike.

Market Opportunities

On June 9, 2015, President Rousseff uncovered another base concessions program, which is expected to draw US \$64 billion in venture throughout the following five years and past to update and work parkways, railroads, ports and air terminals crosswise over 20 states of Brazil. The new concessions will have less access to state bank financing than past tasks, as bidders will be required to utilize private financing also.

The first Olympic Games in South America going to held in Rio de Janeiro in the summer of 2016 and expected to generate copious business opportunities for particular sectors. The Government of the State of Rio de Janeiro estimates that investments in the State between 2010 and 2016 will reach US\$ 50 billion, in sectors including infrastructure, construction, transportation and others. Most of these investments will be done under Brazil's Public-Private Partnerships (PPPs).

The Rio de Janeiro Olympic Organizing Committee started their obtainment process identified with the Olympic Games in mid 2014, however new open doors will be discharged all through 2015 and into 2016. The promising territories for fares and speculation incorporate farming hardware, building and development, aviation and flying, wellbeing and security gadgets, IT, oil and gas, therapeutic gear, brandishing products, ecological innovations, retail, and transportation.

Market Entry Strategy

Achievement in Brazil's business society depends intensely on the improvement of solid individual connections which is the establishment of profitable business organizations. In the larger part of cases, firms require a home vicinity, so creating connections; incessant visits to Brazil are required. It is urging to visit Brazil to meet one-over-one with potential accomplices, and offers a calendar of administrations through which organizations can meet with pre-screened potential customers or accomplices in individual gatherings.

It is fundamental to work through a qualified agents or merchants while growing new business in the Brazilian market. A few firms might need to build up an office or

joint endeavor in Brazil. It is troublesome for organizations to get included in broad daylight segment acquisition at the government or state levels without a Brazilian accomplice, or a physical vicinity in Brazil.
